

Roi Mark Gamba

Software Development Engineer in Test & Full-Stack Developer with 8+ years building and testing software. I build robust systems, automate the hard stuff, and ship software that doesn't break in production.

— SKILLS

Testing	E2E/Regression Testing, Load Testing, Smoke Testing, Unit Testing, API Testing, Visual Regression Testing, ISTQB methodologies
Test Automation	Playwright (C#, TypeScript), Selenium (Java), Cucumber BDD, TestNG, JMeter, Applitools
Languages	Java, Python, C#, PHP, JavaScript, TypeScript, SQL (MySQL, PostgreSQL, T-SQL)
DevOps & Cloud	Azure DevOps, Jenkins, AWS CodePipeline, Docker, Git, AWS, Azure, Digital Ocean
Frameworks & Data	Node.js, Vue.js, Laravel, FuelPHP, Maven, WordPress, Tailwind, Bootstrap; Data Modeling, Query Optimization
AI Engineering	Agentic development with GitHub Copilot and Claude Code, spec-driven development with Spec-kit, LangChain, embeddings and RAG, AI testing agents

— EXPERIENCE

Software Development Engineer in Test

May 2025 - Present

Comrise (deployment to Willis Towers Watson)

- Designed and maintained End-to-End and Integration test suites using Playwright (C#) and TypeScript, increasing automated test coverage and significantly reducing regression testing time.
- Implemented visual regression testing with Applitools, enabling early detection of UI inconsistencies and preventing visual defects from reaching production.
- Managed CI/CD pipelines in Azure DevOps, improving build stability and reducing pipeline failures through proactive monitoring and repository optimization.
- Contributed to the development and enhancements of Testing Agents (Planners, Generators and Healers), reducing time to plan, execute and write test scripts from 1-2 days to 3-4 hours.
- Contributed to an API-driven development initiative across distributed teams using C# .NET, TypeScript and GraphQL, reducing API-related defects through early validation.

Software Automation Engineer II

June 2024 - May 2025

TrustArc, Inc.

- Developed and maintained automated regression test suites using Java (Selenium) and Playwright with Cucumber BDD, increasing test coverage and improving reliability of critical user flows.
- Designed and executed performance and load tests using JMeter, identifying system bottlenecks and ensuring stability and scalability under peak conditions.
- Integrated automated test suites into CI/CD pipelines via Jenkins and AWS CodePipeline, improving release efficiency by 25% and accelerating feedback cycles.
- Mentored junior engineers on test automation practices, coding standards, and framework design, reducing testing errors by 30% and improving overall team productivity.

Software Developer II · DevOps · QA Automation Engineer

May 2022 - May 2024

Bizmates Philippines, Inc.

- Developed an automation testing framework using Java Selenium, TestNG, and Jenkins, decreasing regression testing time by 30%.
- Spearheaded the development of the Spark Hire Integration in the Applicant Portal, reducing interview manpower requirements by 20%.
- Upgraded the Finance Management System from Laravel 5 to Laravel 10 and from VueJS 2 to VueJS 3, boosting performance and security.

Software Engineer · Lead Engineer

August 2017 - May 2022

Atlantis System's Technologies Filipinas, Inc

- Led a team to upgrade the Online Reservation System from version 4.19 to 4.35, improving system performance and user experience.
- Migrated from a dedicated server to Digital Ocean Cloud, increasing scalability and operational efficiency, and integrated Xendit for enhanced payment capabilities and reduced transaction fees.

— EDUCATION

Bachelors of Science in Information Technology

Graduated 2018

Far Eastern University - Makati
